## PRESS RELEASE

### **Integral Announces FCA Authorisation to Operate Multilateral Trading Facility (MTF)**

#### ***Integral MTF Will Provide Quick Onboarding and Fully Compliant MiFID II Trading***

**PALO ALTO, California (December 22, 2017)** – Integral ([www.integral.com](http://www.integral.com)), the financial technology partner trusted by leading banks, brokers, and investment managers to design, deliver and grow their FX businesses, announced today that it has received approval from the United Kingdom’s Financial Conduct Authority (FCA) to operate a multilateral trading facility.

“We are excited that the FCA has approved Integral MTF,” said Harpal Sandhu, Integral CEO. “We have worked extensively with our customers to deliver an MTF that lessens the impact of MiFID II on their businesses and takes the risk and confusion out of meeting reporting and best execution requirements.”

Integral MTF™ leverages the award-winning technology that supports Integral OCX™ (Open Currency Exchange) and includes all the features and services necessary for clients to conduct MiFID II compliant trading. Integral’s customers are engaged in the full lifecycle of FX, so they need to maintain MiFID II compliance when they execute in the market. Integral MTF will provide enhanced surveillance practices, monitoring procedures, and execution analysis for transparent and compliant trading of FX Forwards, Swaps, and NDFs.

Trading on Integral MTF offers:

- All the advantages of OCX: richest liquidity, fastest engine, lowest price
- Free screen trading for takers

This flexible, MiFID II compliant trading venue seamlessly integrates with Integral’s workflow products – BankFX, InvestorFX, MarginFX – so customers can design and deliver complete solutions tailored to their business. Integral will deliver its entire platform with services necessary to meet MiFID II requirements including assistance with pre-trade and post-trade transparency, surveillance, TCA, reporting, and record keeping.

Because Integral MTF is built on flexible, cloud-based technology, Integral can apply best practices for MiFID II compliance for all customers while also customizing the venue to meet each customer’s unique requirements. As interpretations evolve, Integral can accommodate the changes through simple configuration.
